

THIS SUMMER, BE YOUR OWN BOSS

More than an internship, create your own job, by starting a business. Selected students join a cohort that represents one of the 2018 Builder cities. The Builders internship is a four week customer creation bootcamp for high school and college students with the talent and aspiration to be their own boss. Builders experience the entrepreneurial steps of a start up as they design, launch, and sell a product. Builders are paid based on their weekly performance and progress. Students earn pay, work experience, college credit*, a Builder Certificate, and lifelong membership in the Global Builders Network. Builders is a Strengths Lab Experience rooted in Gallup research and science including Clifton StrengthsFinder and BuilderProfile10.

*Washington, DC cohort only
